## PROJECTS

### AI Travel Platform

AI-powered travel technology platform that helps users plan and book personalized trips based on their preferences and requirements. It generates customized travel packages, making travel planning faster, smarter, and more convenient.

- Developed key product features such as Package Reusability and Package Modification, enabling users and operators to clone, reuse, and edit travel packages, improving operational efficiency.
- Upgraded the application from Angular 12 to Angular 19, ensuring backward compatibility while adopting modern architecture, patterns, and tooling.
- Enhanced application performance and stability by identifying and fixing memory leaks and optimizing critical user workflows.
- Led the frontend design and development of the Luxury Hotel Platform, delivering a specialized experience for premium hotel packaging and booking.

**Technology:** Angular 19, TypeScript, HTML5, SCSS, RxJS, REST APIs, Bootstrap, PrimeNG, Python

### Sports Predictions Site

Built a cutting-edge sports prediction platform from scratch, enabling users to forecast tennis and football matches. The site offers a variety of features, including match calendars, rankings, head-to-head statistics, and betting insights, along with search functionality for players or teams.

- Developed highly responsive user interfaces using Angular 16 and Bootstrap, ensuring a seamless user experience across devices.
- Participated in requirement analysis meetings and contributed to finalizing intuitive UX designs.
- Enhanced Google rankings by applying SEO techniques and leveraging Angular SSR (Server-Side Rendering).

**Technology:** Angular 16, HTML5, CSS3, Bootstrap, RxJS, NestJS, Ngx Universal (SSR), REST web services

### Video Course Simulator

Engineered an innovative e-learning platform tailored for medical students to access video tutorials, capture practical work, and track their progress. Included functionality to enhance learning and grading processes.

- Built key modules such as Video Recording, Screenshot Capture, and Results Tracking with Angular 12.
- Focused on accessibility by implementing multi-language support using ngx-translate.
- Worked closely with the design team to ensure a smooth and intuitive user flow.

**Technology:** Angular 12, HTML5, CSS3, JavaScript, PrimeNG, REST web services, Tailwind CSS
